Front-end web developer with experience in JavaScript, and React. I discovered web development through my study field in computer engineering. In my specialization in AI I want to connect it with websites to make websites more effective and useful.

TECHNICAL PROJECTS

Abbuloka- [Github](#) | [Demo](#)

A basic website for marketing .

+ Elements transition using CSS.

+ Used Bootstrap for responsive styling.

Movie App - [Github](#)

A single-page website to search for movies and show data from The Movie Database (API movie).

+ Used React to search, fetch, and show lists of movies.

+ Utilized Material UI for styling.

Mentorship - [Github](#) | [Demo](#)

Small website that allows you to find a Mentor/Mentee and connect with them really easy

+ Firebase for backend

+ Used HTML,CSS,JS,Material UI for styling.

Portfolio - [Github](#) | [Demo](#)

An online portfolio to share my experience as a front-end developer.

+ Used React with routes to build multi-page website showing different aspects of the work.

+ Used Bootstrap and material UI for responsive styling.

+ Component transition using CSS.

TECHNICAL SKILLS

SQL,HTML/CSS, JavaScript, React, Bootstrap,Intermediate Adobe Photoshop,social media marketing, Matlap, Webot,neural network,fuzzy logic.
